## THE AIM AND METHODS OF THE STUDY

**The aim of the study** is to develop the classification of the criteria for cryptocurrencies and justify the characteristics of their indicators.

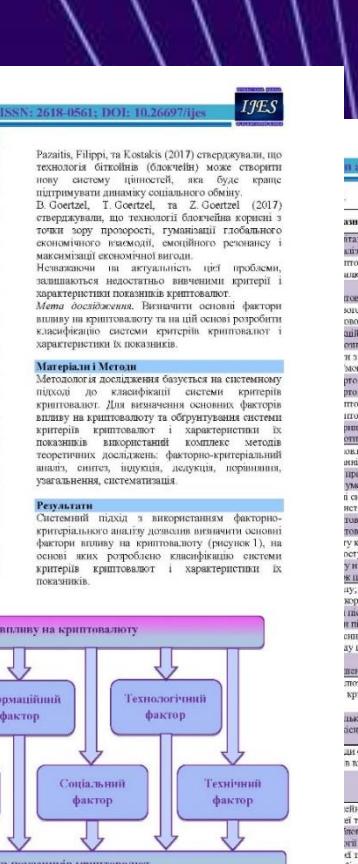

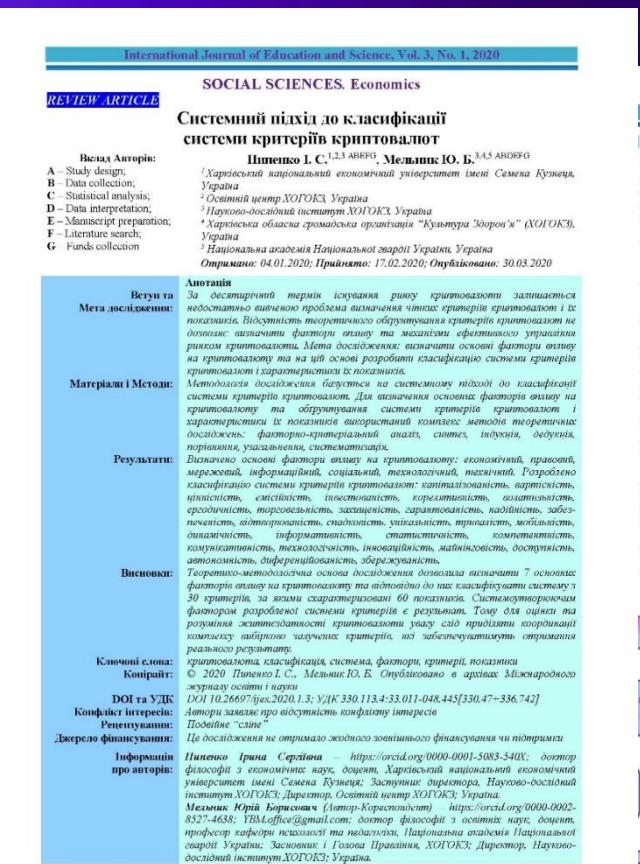

To substantiate the classification of the criteria for cryptocurrencies, the following complex of theoretical research **methods** has been used:

- deduction and induction,
- analysis and synthesis,
- comparison,
- generalization,
- systematization and interpretation of results.

# CLASSIFICATION OF THE CRITERIA FOR CRYPTOCURRENCIES

- |                    |                       |                       |
|--------------------|-----------------------|-----------------------|
| 1. Uniqueness      | 11. Mobility          | 21. Trading           |
| 2. Correlativity   | 12. Reproducibility   | 22. Issuance          |
| 3. Accessibility   | 13. Cost              | 23. Guarantee         |
| 4. Dynamics        | 14. Reliability       | 24. Protection        |
| 5. Investability   | 15. Autonomy          | 25. Security          |
| 6. Volatility      | 16. Value             | 26. Safety            |
| 7. Duration        | 17. Multidisciplinary | 27. Recovery          |
| 8. Competence      | 18. Differentiation   | 28. Heredity          |
| 9. Adaptability    | 19. Ergodicity        | 29. Communicativeness |
| 10. Innovativeness | 20. Statistics        | 30. Informativeness   |
